Hi Vivian,

Here is my GSA report:

### **GSA Board Report, July 10 Meeting**

1. The Board approved a funding structure based on extraction fee only at \$18.00 per acre-foot. De minimis users (residential users at less than 2 acre-feet) will not be charged a fee.

The GSA staff will present a recommendation of charges, if any, at the next meeting for ranchers using less than 4 acre-feet for cattle watering, and for CCSD, it will not exceed the \$18.00 per acre-foot and amount and will probably less.

The GSA staff will also provide "make-up" recommendations for land owners who bring previously non-irrigated land into production.

2 The Board approved a 2019-2020 budget for just over 1 million dollars which will be paid for with pump extraction fee.

3 The Board approved of moving the adoption process back four week to allow for some recommend changes.
